WHAT IS BASIC BESPOKE ?

Basic Bespoke established a new family of products within the Laufen brand, known for its genuine design and highest quality bathroom products.

BASIC BESPOKE

Washbasins adapted to the needs of each client, based on a selection of available bowls and the use of SENTEC material, which allows for flexibility of dimensions and shapes.

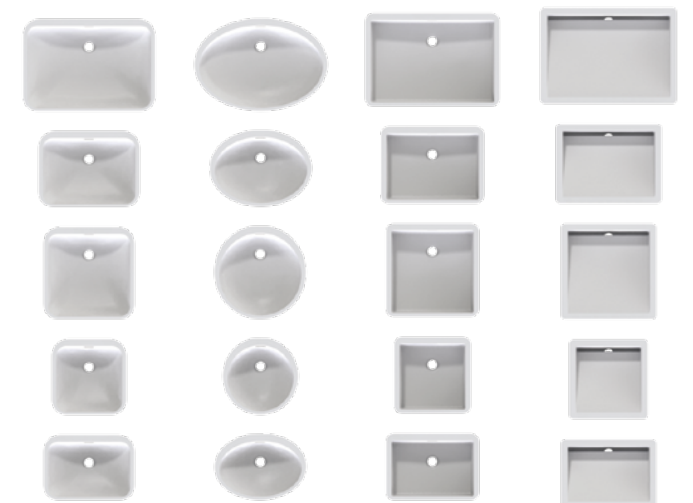

CUSTOMIZATION LEVEL

The available 20 bowl models allow you to adapt the appearance of the washbasin to the general bathroom concept.

AVAILABLE MEASURES

With BASIC BESPOKE, the dimensions of the product can be adapted to the needs of each client.

ENQUIRIES

Quotes are generated immediately, and samples are available in two weeks.

PRODUCTION

Bowls, which are constantly in contact with water, are casted in one piece. Thus, they have superior resistance to impacts and temperature differences. The BASIC BESPOKE bowls have the integrated overflow, which ensures their tightness and increases the safety and hygiene in the bathroom.

5-YEAR WARRANTY

LAUFEN provides a 5-year warranty on all BASIC BESPOKE products.

GLOBAL STRENGHT

During more than 120 years of its history, LAUFEN has grown into a global company employing 1800 professionals and operating in 44 countries

EUROPEAN PRODUCT

LAUFEN production centers are located in Europe. BASIC BESPOKE basins are hand-finished.

EXPERIENCE

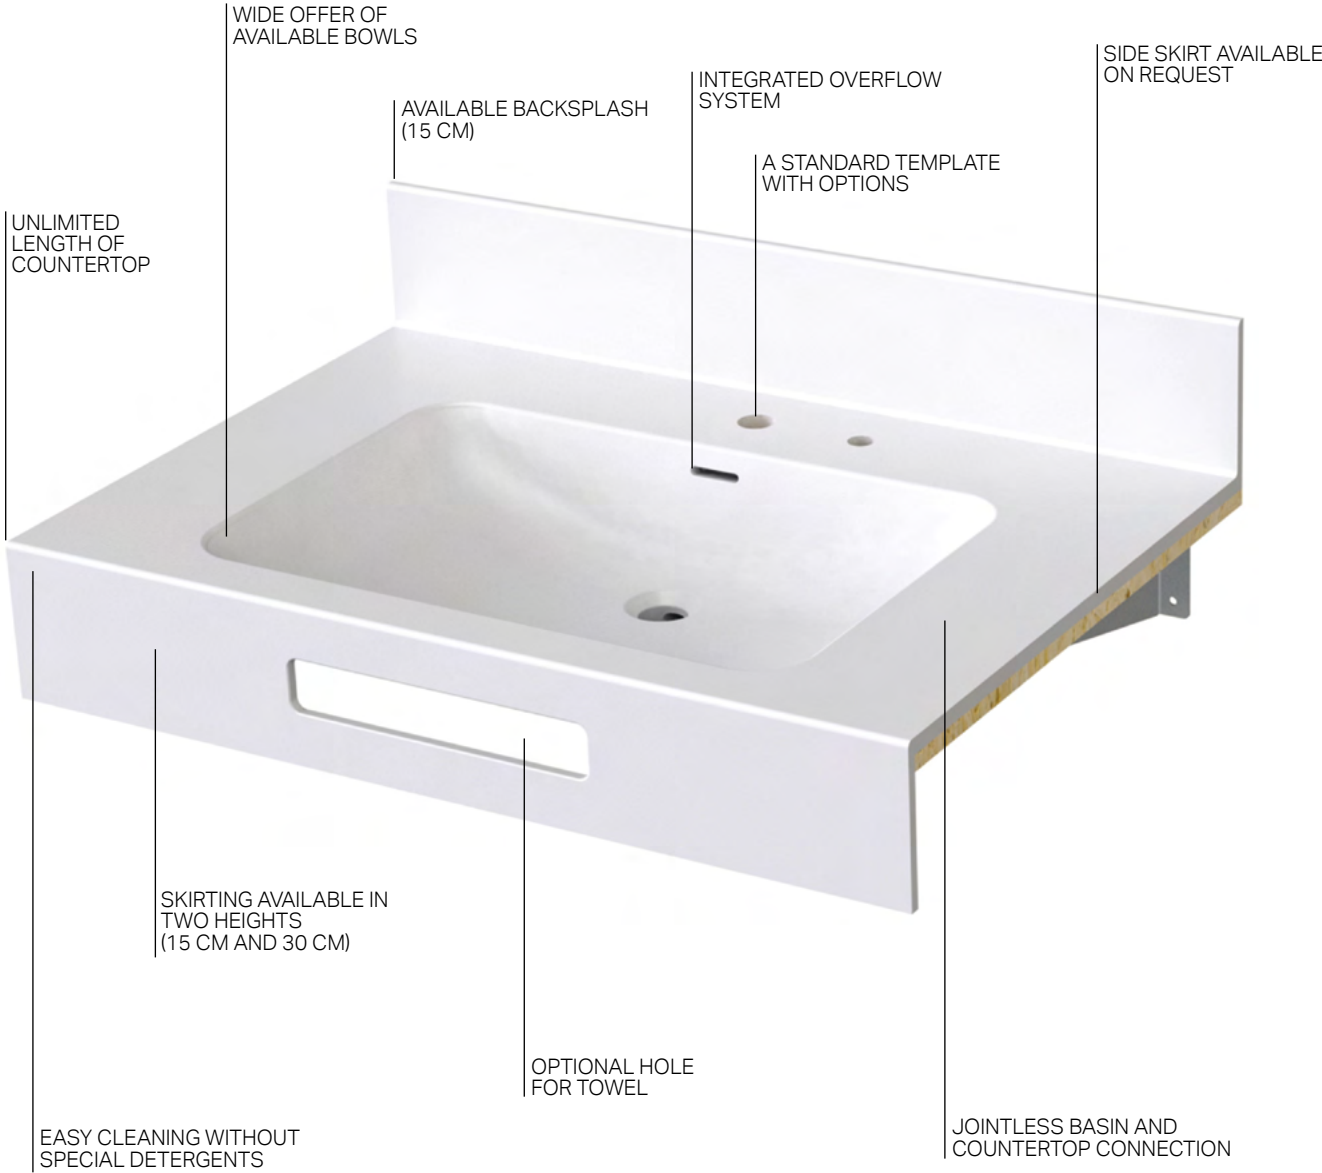

The experience gained in a multitude of tailor-made representative projects, made in collaboration with renowned architects and designers, allow us to deliver more advanced solutions.

QUALITY

High quality raw materials and precise control of the production process ensures the highest quality of final products.

WHAT IS SENTEC ?

SENTEC is a cast material produced from different natural minerals and high quality resin, which are combined according to the LAUFEN formula.

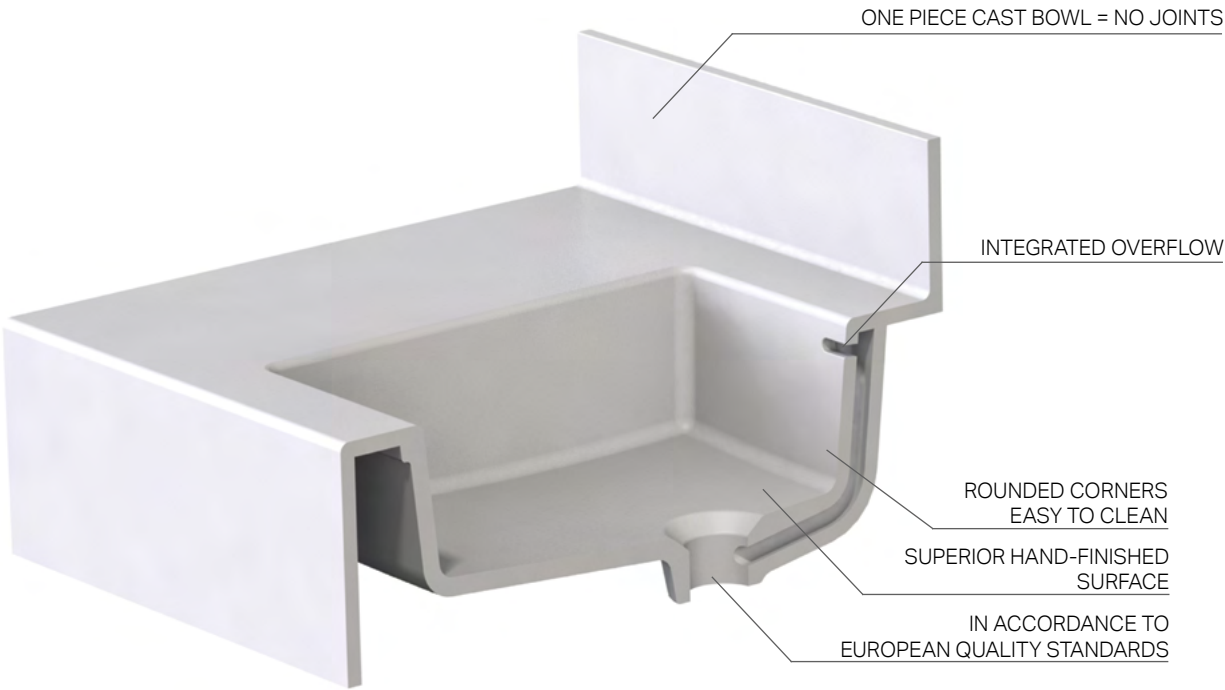

Pieces cast in SENTEC can be glued together without visible joints, maintaining the homogeneity of color and properties of the material throughout the product. The gentle, smooth surface of the material and its semi-matt finish ensures an attractive visual effect.

RESISTANT

SENTEC is a scratch and impact resistant material. It maintains its attractive appearance under the effects of the daily use and cleaning agents in the bathroom.

ENVIRONMENT

Our production centers comply with the most rigorous regulations, while also focusing on the reduction of waste generation and energy consumption.

ADVANTAGES OF BASIC BESPOKE

REDUCED PRODUCTION TIME

The standardization of the product, together with the most modern facilities in our production centers, ensures an agile response to the requests from our customers.

CONSTANTLY GROWING BASIN CHOICE

The continuous cooperation with architects and designers and the realization of projects worldwide, inspires us to introduce new solutions and to expand the BASIC BESPOKE catalog with new models of washbasins.

INSTALLATION-READY PRODUCT

The fixing system is delivered together with the washbasin, along with detailed and simple instructions. The washbasin is delivered ready to be fixed to the wall and be equipped with faucets, siphons and other accessories according to the wishes of each client.

PRODUCT IN ACCORDANCE WITH THE STANDARDS

BASIC BESPOKE washbasins comply with international standards, which guarantees their quality and compatibility with the different installation elements common in each country.

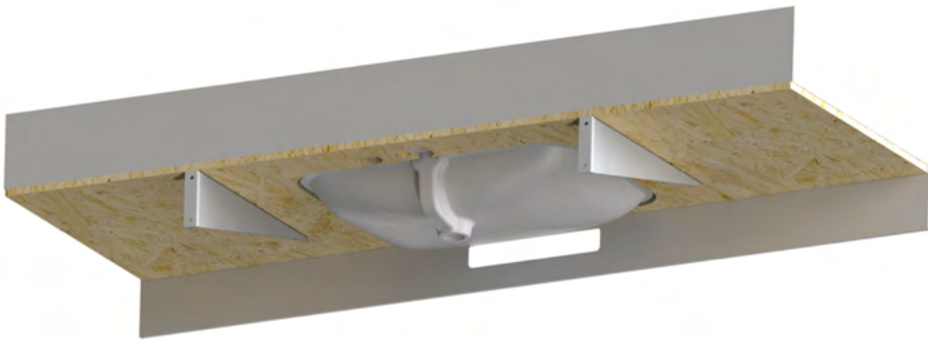

WHY TO CHOOSE SENTEC ?

ANTIBACTERIAL MATERIAL

Sentec is non-porous and its monolithic pieces prevent the growth of bacteria. In addition, it has been developed in accordance with the DIN EN ISO 846 standard. It is a non-toxic material, which can be used in bathroom spaces and other places that are in contact with water.

LONG-LASTING MATERIAL

SENTEC is a very strong and durable material. Should an accidental damage occur to the product, LAUFEN provides a repair kit with which the product can be fully restored. After many years of use, it is also easy to buff out any signs of wear and tear, increasing the overall lifespan of the product even further.

STANDARDIZED INSTALLATION

Unified bracket system enables earlier preset of installation spot and later simple assembly.

CUT ON - SITE

BASIC BESPOKE washbasins can be cut on-site in order to adjust to the unique geometry of each site.

HOW TO WORK WITH BASIC BESPOKE

COUNTERTOP DEPTH [mm]
min 300 mm
max 700 mm

COUNTERTOP LENGTH [mm]
min 800 mm
max 2800 mm*
*countertops longer than 2800 mm will be delivered in several elements

TECHNICAL SPECIFICATIONS

Item	Description						
Colour	White						
Colour stability	Colour stability tested. Resistance to UV light						
Texture	Satin						
Form	12 washbasin bowls and unlimited number of countertop sizes thanks to Sentec Surface features like joint element connection.						
Thickness	Standard thickness: 10 mm.						
Surface hardness	According to the Barcol hardness scale ≈ 62 HBa						
Elasticity (Mechanical durability)	UNE53023. Tensile strength: 36,6 MPa						
Density	DIN ISO 1183: 1,73 g/cm³						
Compressive strength	EN ISO 604: ≈ 170MPa.						
Bending resistance	DIN EN ISO 178: ≈ 60MPa						
Resistant to scratches and impacts	Resistant to the majority of impacts and scratches that may appear from everyday use of the bathroom space. DIN ISO 4586 T12 standards: Sphere test >120 cm						
Hygenic and anti-bacterial	DIN EN ISO 846 standards: Material with hygienic properties not conducive to the growth of fungi, bacteria, and other microorganisms. SENTEC Surface is non-porous material and has no joints.						
Possibility of renewal	It is possible to renovate the product by removing the outer layer of the surface. Easy to maintain. For everyday cleaning, you do not need to use any abrasive cleaner.						
High fire resistance	It is virtually fireproof as it does not allow flames to spread.						
Application	Both private and public bathroom spaces.						
Possibility of units	Possibility of units such as drains, holes, soap dispensers, among others.						
Maximum dimensions	Maximum length of one countertop element is 2800 mm. Longer washbasins are delivered in sereval elements and need to be glue on side.						
Resistance to high temperatures	ISO 19712-2:2007 standards – resistance to: - warm dry air - warm humid air						
Resistance to chemical agents	UNE 14527: Resistance to acids. UNE 14527: Resistance to alkalis. UNE 14527: Resistance to ethanol 70%. UNE 14527: Resistance to bleach max 5% active chlorine.						
Easy to repair	The renovation and/or repair of the damaged product can, in most cases, be done without reinstallation. All necessary actions can be done on site.						
Cleaning	Sentec Surface can be cleaned without the need to use an abrasive chemical cleaner. You can use water or, for “stubborn dirt”, a gentle cleaner.						
Installation	Installation can be carried out by our technical service or by expert installers.						
Warranty	5 years						
Warranty	5 years						
Size deviations [mm]	Size	up to 30	30-120	120-400	400-1000	1000-2000	over 2000
	Tolerance	+/- 1	+/- 1,5	+/- 2	+/- 3	+/- 4	+/- 6

CARE AND MAINTENANCE

Everyday cleaning

It is recommended to clean any kind of dirt as soon as it appears in order to keep the product in its best condition.

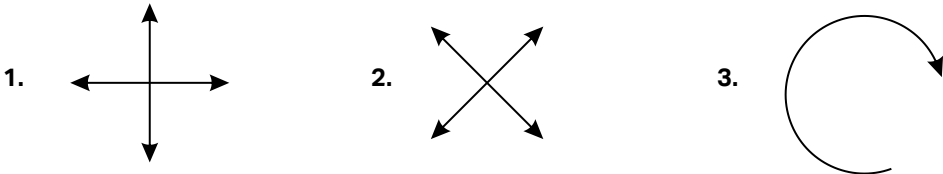

Most of the stains caused by everyday use can be removed using e.g. UNIKA product dedicated for Solid Surface applied with a soft damp cloth (i.e. cotton or microfiber) or soft paper-towel.

After the application of any cleaning product, rinse all areas thoroughly with warm water in order to remove the detergent and dry all wet surfaces with soft cotton or microfiber cloth.

Resistant stains

Resistant stains caused by cosmetics, coffee, wine, cigarette ash, detergents, etc. should be removed immediately with a soft cloth. Afterwards clean the stains, as in the case of daily care. It is recommended to use only soft cotton or microfiber cloth. Any scratching materials (e.g. scotch brite green) should not be used.

The cleaning process should be done in series of movements: right-left, up-down, diagonal and circular, as shown in the graphics below:

Renewal of the surface finishing*

After a long period of intense use or in case of big resistant stains or scratches in large areas, it might be necessary to renew the original surface finishing. This can be achieved by sanding the surface with orbital polishing machine with dry sandpaper with foam (500 fine-grain) The least amount of pressure possible should be used when sanding.

* The renewal should be conducted by a person trained by the manufacturer.

General remarks - SENTEC specification

Any material, incorrectly maintained may be damaged. The most common problems and the possibility of losing warranty benefits may be caused by:

- the use of harsh chemicals (e.g. solvents-based measures, measures to drain sewage system, etc.),
- contact of the product with chemicals, boiling liquids and hot objects,
- mechanical damage, in particular: an impact.
